## Summary of Qualifications

---

An ambitious computer science student with a growth mindset and a passion for enhancing user experiences. Skilled in problem-solving and familiar with computer hardware, architecture, and software development life cycle (SDLC) methodologies. Strong communicator with proven experience in teamwork, having collaborated within IT teams to deliver high-quality software solutions. Experienced in customer-facing roles, possessing a keen eye for detail and a strong sense of customer empathy. Demonstrates the ability to manage tight timelines and work with a sense of urgency, ensuring tasks are completed efficiently and effectively.

## Education

---

**Toronto Metropolitan University**

**Sep. 2020 – Present**

*Bachelor of Science in Computer Science (Co-op)*

*Toronto, ON*

## Relevant Coursework

---

- |                        |                       |                           |                         |
|------------------------|-----------------------|---------------------------|-------------------------|
| • Data Structures      | • Algorithms          | • Artificial Intelligence | • Web Development       |
| • Software Methodology | • Database Management | • Computer Networks       | • Computer Architecture |

## Experience

---

**FGF Brands Inc.**

**May 2022 – April 2023**

*IT Software QA Co-op*

*North York, ON*

- Operated in a fast-paced Agile Scrum environment, collaborating closely with the QA team leader to adhere to sprint timelines and deliver high-quality software
- Conducted meticulous testing of in-house web and (Android/iOS) applications, ensuring defect-free and optimal functionality to enhance user experience
- Skillfully utilized Azure DevOps to identify, log, and document bugs, providing developers with comprehensive information for efficient resolution and fostering seamless collaboration between QA and development teams
- Executed comprehensive regression testing on all applications, verifying that previously developed and tested software met specified requirements and maintained stability
- Conducted the smoke testing of two major applications single-handedly in the absence of a crucial team member, catching defects ahead of their go-lives
- Defined and documented detailed test cases/scripts, analyzing functional requirements and technical specifications to facilitate manual testing of larger applications

**Ontario Chamber of Commerce**

**May 2023 – August 2023**

*E-commerce Advisor Co-op*

*Toronto, ON*

- Provided guidance to SMEs and potential applicants, facilitating a deeper understanding of the CDAP Grow Your Business Online grant application process and eligibility criteria
- Addressed program-related inquiries from SMEs and potential applicants, delivering clear and comprehensive information to resolve questions and alleviate concerns
- Developed innovative resources such as a guide and infomercial to support SMEs in boosting their e-commerce initiatives, contributing to increased awareness and participation in the program

## Projects

---

**Battleship Game | HTML, CSS, JavaScript**

- A browser-based Battleship game developed using HTML, CSS, and JavaScript, showcasing proficiency in front-end development and problem-solving
- The game features ship placement, rotation, and attacking for both player and computer, demonstrating object-oriented programming principles
- Incorporated event handling for player interactions and simulated computer AI for opponent turns
